## **DENON PROFESSIONAL SHOWS OFF ITS EXCITING NEW PORTABLE 3-PIECE PA SYSTEM AT NAMM AMONG NEWLY REVAMPED LINEUP**

*Leading innovator of professional AV integration solutions debuts new Envoi Go portable PA and DN-300C CD/USB player, among extensive new line of professional AV integration products.*

**Cumberland RI, USA** (January 21, 2016)—Denon Professional ([denonpro.com](http://denonpro.com)), a leading developer of premium hardware solutions for the professional A/V market, today announced the introduction of their exciting new Envoi Go portable 3-piece PA system, headlining their exciting new line of extensively revamped products at Winter NAMM.

The Envoi Go fills the requirement for a compact, full-featured, high performance/high powered PA system that has the versatility to operate off its long-lasting internal rechargeable battery as well as from external AC power. Envoi Go has two XLR balanced inputs, two ¼-inch line inputs and two 1/8-inch stereo inputs, so it can accommodate virtually any connection or mixing scenario. It streams music wirelessly from any Bluetooth®-enabled device and it also has a built-in USB/SD (MP3/WMA) player, making it perfect for unattended playback.

Performance and thoughtful convenience features abound: It's 3-piece design folds up into an easily-transportable "suitcase" that weighs less than 29 lbs., making it easy to bring great sound anywhere. Mounting options are almost unlimited, since all three pieces have industry-standard pole-mount sockets. The speakers are true 3-way units with 6.5" woofers and dual 3" mid/high-frequency drivers. The system delivers a staggering 300 watts peak, 150 watts RMS, so covering a large space with clear sound is a snap. Finally, the built-in rechargeable battery lasts up to five hours, for an uninterrupted performance.

Envoi Go features:

- Two 3-way active speakers (Each speaker: 6.5-inch low-frequency driver, two 3-inch mid/high-frequency drivers)
- Total system power: 300 watts peak, 150 watts RMS
- Powered by AC or rechargeable battery
- Built-in rechargeable battery provides up to 5 hours of dynamic sound
- Bluetooth® connection for wireless audio streaming
- Built-in USB/SD (MP3/WMA) player for unattended playback
- Pole-mount socket on all three enclosures
- 2-band EQ per channel
- 16 user-selectable digital effects

- Two XLR balanced inputs, two ¼-inch line inputs, two 1/8-inch stereo inputs
- Track recording input and output, ¼-inch auxiliary output
- Universal AC Input

Also on display is all-new DN-300C CD/USB playback device. The 300C is a 1RU-sized player, capable of extremely high performance, with the added flexibility of a convenient front-panel port for playing back material from a USB thumb drive. Simple to operate, the purity of its audio performance is truly remarkable at its modest price point, giving the professional a rugged, no-compromise playback solution that occupies a mere 1RU of space.

DN-300C features:

- CD/USB playback device
- High-quality professional CD player
- USB audio playback
- Balanced XLR output
- Stereo RCA output
- High-quality slot-load CD drive
- Space-saving one rack unit size

“The new Envoi Go portable PA system epitomizes the new Denon Professional approach to professional A/V playback/recording/signal management equipment,” said Paul Jenkins, Director of Sales for Denon Professional. “Envoi Go performs to the very highest level possible with an emphasis on ease-of-use and precise suitability to the task at hand. Like our entire product range, it represents a truly remarkable value—its build quality and sonics are far beyond what would normally be expected at this price.”

Envoi Go will have a U.S. retail of \$549 and be available in Q1 of 2016.

The DN-300C will have a U.S. retail of \$199 and be available in Q1 of 2016.

Please visit Denon Professional in Hall A Booth #6700 at Winter NAMM.
